CS PROJECT SYNOPSIS – 2020-21

<u>Objective</u>: To create a software/program that is tangible and useful using Python/Python and SQL connectivity.

<u>Topic/Name of the Program/Software</u>:" Multiplex Theatre Ticket Management System (MTTMS)

<u>Requirement</u>: Python and MySQL

<u>Program/Capability</u>: Maintain a database for a Multiplex Theatre and perform most of the MySQL function in it with the help of Python interface like insert, update, delete, compare, search/search any record and many other functions.

<u>Steps included to create the Program</u>:
Performing/executing the first 7 steps of Python connectivity with MySQL and then later applying other functions for other features.

<u>Group</u>: Bhavesh Vinchurkar & Chinmay Bhagat

<u>Class</u>: 12th 'A'

<u>Teacher</u>: Prakash Sir
